GENERAL NOTES:

Details indicated on this sheet are intended to show the general requirements of sign location for the various types of conditions normally utilized. Any variation from the conditions shown shall be done only as specified by the Engineer. Sign installation hereon as applicable shall be done in accordance with the requirements of current Iowa Department of Transportation Specifications for Signing Interstate Highways.

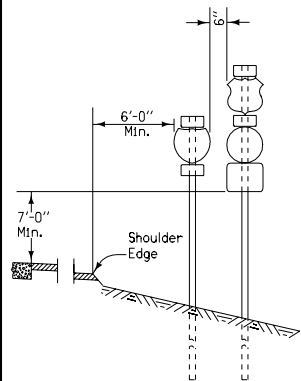

See "Summary of Materials for Type 'A' Signs" and the Sign Type and Location Plan Sheets for data regarding specific sign assemblies.

The details indicated hereon are typical. It shall be the contractor's responsibility to familiarize himself with the actual conditions at the site and the requirements for each sign installation.

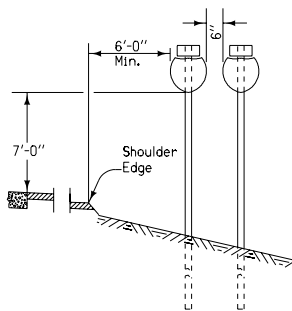

Dimension 'X' is shown on the Summary of Materials for Type 'A' Signs.

Refer to Sign Type and Location Plan sheets for data regarding specific sign assemblies.

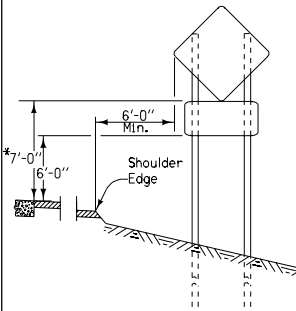

Final location of Signs shall be at the discretion of the Engineer.

SIGN LOCATION**
Type - 3 Installation

Details indicated for Type 3 Installation are intended to show the requirements for a Type 'A' sign when installed in an island or median (where traffic passes on both sides of the sign) as well as for locations where the Type 'A' sign is installed adjacent to a curbed roadway (sign may be located on either side of a roadway as specified in project plans).
